

SD Discovery Center Classroom Membership

A classroom membership to the SD Discovery Center provides many benefits such as:

- Unlimited free admission to the SD Discovery Center exhibit hall for one year. A trip to the SD Discovery Center is great for kicking off and ending the school year or as a class reward. Visit during units on electricity and magnetism, aquatic biology and light and mirrors to utilize exhibits that teach these concepts.
- No rental fees on teaching kits, backpacks and GEMS kits and guides (shipping charges do apply).
- First invited to special school programs.
- An individual membership to the SD Discovery Center for the member teacher. This membership is recognized at other science centers as part of the national Association of Science and Technology Center's passport program. See <http://www.astc.org/members/passlist.htm> for participating organizations and their policies.

A classroom membership costs \$75. It covers one class of students and is good for one calendar year. Teachers who teach multiple classes (i.e. middle school science teachers) should contact the SD Discovery Center for rates.
